Sep 28

	Aditya	Alpana	Matt	Kennedy	Cherie
What did you do last week?	Committed to master branch to build foundation; instituted documentation practice in the GitHub repo; Trying to get CI pipeline set up; diving into testing framework	Jira Epics updated; worked on authentication; created an epic overview and epic burndown chart; started the first sprint	Getting comfortable with React; Most of first page done.	Learning React.js to work on MyProfile page; Learning Git/Github	set up a branch for herself; tried to get accustomed to React
What will you work on this week?		integrating with Cherie's frontend screens; Working on the sign in and sign up authentication with firebase	Continue with current Page: My Home	Work on MyProfile page	Trying to work on Signup1; Will talk to Alpana or Matt or anybody else on documents to decorate and connect React pages
Do you have any blockers preventing this?	CI pipeline is failing to save at times due to a dependency issue	Some runtime errors but I should be able to figure those out soon	Still learning. Errors happen, but fixable.	Not knowing Git/Github too well.	getting ton of errors--; "sometimes npm start works for me and sometimes it doesn't, not sure if I'm doing it right/how to do this efficiently yet."

3 Major Takeaways From Meeting

1. Using object-oriented codebase for improved readability and syntax.

2. 2-week sprints are now 1-week sprints

3. Need icons for sidebar menu - tasked to David

	Aditya	Alpana	Matt	Kennedy	Cherie
What did you do last week?	Fixed dependency issues in Master branch	Front end sign up screens developed and pushed to the LoginScreens branch in GitHub	Side and Nav 90% done. My home 50%.	Accustomed to git/github. Created a branch My Profile	Content for Startup1, Startup 2, researching React CSS
	Started Properties page. Finished integrating Google API, basic layout for page, and integrated NavBars			Big progress with the MyProfile page	
What will you work on this week?	Pair coding with Kennedy	Integrate firebase with the login screens to ensure that data is getting stored	Finish minor Side and Nav issues	Adjust cards on the grid layout for the center of My Profile page	Completing Startup1, StartUp2 with CSS
	Discuss new layout for Properties page with Dave – continue working on this page. Hopefully finish UI this week		My Home page format		
			Sidebar Active tab issue		
			Learn more react		
Do you have any blockers preventing this?		Font issues	Home related issues this week.	Some bugs with the flexbox grid in the center. Still learning react, improvement+	No blockers-- need to look at Alpana's code
					time zones

3 Major Takeaways From Meeting

Seperate CSS files for each page should be located in "styles" folder in Repo

Sign-up/Sign-in almost done - beginning backend soon

Shared Google Sheet in Dev Drive will be created to report all CSS elements that need work

	Aditya	Alpana	Matt	Kennedy	Cherie
What did you do last week?			Worked more on myHome page. Card design and layout	Worked on My Profile page. Added name display, email, school, bio, and social media icons to understand the user and connect to the user's social media pages. Added gender identity next to the user's name.	Edit and added content for signup1, 2; fixed image error to include alt="" for all logos on signup1,2,3,4,5,8; dabbled into react router; reached out to Alpana and Adi on bug help
What will you work on this week?			finishing myHome page and the nav/sidebar	Fix minor details f the My Profile pa Essentially maintaining the page Code review. Work on another page	Reviewing "Multi Step Form With React" and putting the different signups in different sections, potentially separating them into different components, adding content to Signup 7, 9, 10, 11. Attempting to add CSS to those pages.
Do you have any blockers preventing this?			Issue with active tab highlighting is becoming tedious.	Fixing the text alignment under the user's DOB, Pets, Horoscope, and housing desc information.	Learning Material UI quickly

3 Major Takeaways From Meeting

Oct 19

	Aditya	Alpana	Matt	Kennedy	Cherie
What did you do last week?	Worked on finishing the UI for Properties Page		Worked Further on myHome and the nav/side bar; troubleshooted issues in code	Worked on the My Profile page. Applied better styling practices.	Understanding how to use routes to separate pages with Matt's help.
What will you work on this week?	Finalize UI design based on Dave's feedback; Start developing messaging page	Firebase queries for frontend screens; Start developing messaging page	fine tune myHome and possibly finish nav/sidebar fully	Testing for MyProfile; Fix any bugs found after testing; Work on another page	Separating pages 1-5, 6-10; adding content to pages that do not have content; adding css
Do you have any blockers preventing this?		Testing storage limits and speedy querying	miscommunication for appearance of page		No. Only one might be knowledge of CSS in react. But will ask dev team when I get there.

3 Major Takeaways From Meeting

Oct 26

	Aditya	Alpana	Matt	Kennedy	Cherie
What did you do last week?	Pair coded with Alpana / Tested Twilio chat on vanilla JS	Pair coded with Adi / Pulled and tested the Twilio chat demo	Worked on Payment page layout / further progressed myHome page / Issued a pull request for nav/sidebar / Collab with Ken	Collab with with Matt / Tweaked up MyProfile minor details. Page on 95% / Started a template for the maintenance screen / Pushed branch on Git	1) Work on rest of css content, 2) add style to signup9, 3) connect css page to rest of pages, 4) pushed up to github
What will you work on this week?	Switch accounts to new Smarta domain / Look into integrating Material-UI with Twilio / Look into implementing Twilio JS into react	Switch all accounts to new domain / Integrate the chat feature with our database	Finish myHome and issue a pull request / work on payment page	Finish MyProfile page 100% / Issue PR for the My Profile page / Work on Maintenance Screen	Figure out where Adi used map api to integrated into Signup10
Do you have any blockers preventing this?		Need to enable Twilio without sharing customer phone numbers	Probably issues in code.	Maintaining the MyProfile page	1) Connect third party api to get specific font for signup pages, 2) decorate rest of signup pages

3 Major Takeaways From Meeting

	Aditya	Alpana	Matt	Kennedy	Cherie
What did you do last week?	Researched TalkJS – a seemingly better alternative to Twilio. Deployed TalkJS React Demo with Alpana and got it running. Prototyped UI layouts with Material-UI and TalkJS	Worked on integrating Talk.js with Adi, got the demo up and running	Integrated font for all pages, has to be applied. Worked on myHome and Payment pages. Simple pull request for font	Worked on My Profile screen 99% done. Started working on the Maintenance screen	Signup 1-6, 11 done 95%
What will you work on this week?	Continue to build the chat UI to Jesse's specification. Integrate chat application into our codebase	Create front end and backends for the messaging functionality, merge with master	Finishing up myHome once I talk with David. Dive into Payment page fully. Possibly and finally fix last sidebar bug	Continue working on the Maintenance screen	Signup 7-10, fix font and alignment
Do you have any blockers preventing this?		Accessing contact information from our database instead of hard coding values	figuring out card space	Couldn't separate the bottom attributes in the MyProfile screen.	

3 Major Takeaways From Meeting

Nov 9

	Aditya	Alpana	Matt	Kennedy	Cherie	3 Major Takeaways From Meeting
What did you do last week?	Attended TalkJS meeting with Alpana and Dave		Figured out how to add fonts. Finally...	**Practically finished MyProfile screen**	Finished style for signup screens 8-11 minus 1 thing. Added what's left in Github and Jira.	
	Researched TalkJS clarification questions		Finished Layouts for myHome and Payment pages	Got the template started for maintenance screen		
What will you work on this week?	Finish the chat page		Finish styling changes and tweaks needed	Finish maintenance screen	**Shadow Alpana on backend/other**	
			Learn tons about Firebase			
Do you have any blockers preventing this?			Busy week with appointments	**Hectic schedule**		

Nov 16

	Aditya	Alpana	Matt	Kennedy	Cherie
What did you do last week?	Explored UI capabilities of TalkJS	Talk js backend	Learned a good bit about Firebase.	Worked on Maintenance screen, progress status is about 90% done.	Front end screens for Property managers and owners.
	https://sendbird.com/, https://www.cometch at.com/chat-sdks/reac t, https://getstream.io/	Data analytics project with Nick	Fine tuned minor issues with pages	Minor collaboration with Matt	Spoke with David on edits
	Explored other chat options with flat pricing and customizable UI: SendBird, ComeChat, GetStream			Finished MyProfile screen	
What will you work on this week?	Work with Dave + Alpana on exploring chat options	Finish up the backend for the chat	Hopefully finish all pages 100% and issue pull request	Finish the Maintenance screen	Other screens/shadowing backend
	Finalizing chat app prototype – integrate with app	Find sample data for the prediction model	Work on playing around with firebase on test project		
	Start work on other property manager screens				
Do you have any blockers preventing this?	TalkJS UI is not very customizable – in order to tailor the product, need to converse with TalkJS developer	Integration with the front end	Dave's schedule – With what the rest of the pages need.	Scheduling. But schedule isn't too hectic so not that much roadblock for the week
